Break Start 00:00:00 End 00:00:00 Break Length 0 ☒ Activate Break

Tea Break Setting Update Close

The **Shift Setting** is use for updating shifts depending on the scheduled time. 50 different shifts can be set. **Shift Time Setting** is set to determine the start and end of the shift per day. **Lunch Time Setting** is set for the start and end of lunch break.

Instructions:

1. In updating the start and end of time setting whether it is Shift Time Setting or Lunch Time Setting, be sure to check first the checkbox to enable changes on the schedule time for the desired day.
2. Flexible in shift rules is for those are work in flexible working hour. It can fix the working hour length manually and also the length of work computation.
3. Flexible in lunch rules is for those who are not fix their lunch. In lunch time setting you can set the early time they can out for lunch and the latest time they have back to work. Fix length for the lunch is base on the company.
4. Grace period can also be set in the text box depending on company's grace period preference. Deduction is amount of time to deduction as lateness if the staff use more than grace time set.
5. OT rule enable is for change shift purpose. In another word, those who fall on that particular shift, these OT setting will take effect. However, those in current shift can set the OT at OT Authorization.
6. Click Update button to save the changes made for a certain shift.
7. Click Cancel button to ignore changes and to close the window.

6.2 Employee Profile

The screenshot shows the 'Employee Profile - [Edit]' window. It has a 'General Information' tab. The fields are as follows:

- Enroll No.: 1433, Employee No.: 1433
- First name: ALDIM, SCode: [empty]
- Last name: BIN ROSTA
- Middle name: [empty]
- Address: Lot 1A, Jln. Ikan 3, Kg. Bukit
- Place of birth: Shah Alam, Selangor
- Gender: Male, Birth Date: 01/08/2001
- Nationality: Malaysia
- Telephone no: [empty]
- NRIC: [empty]
- Company: [empty]
- Department: WH-Inwards
- Position: Store Keeper
- Date of hire: 12/08/2020, Shift: Shift 10
- Profile Type: Full Time
- Meal Allowance Threshold (hr) - Normal: 10, WE/PH: 4
- Note: [empty text area]
- Photo: [Employee photo]
- Load Picture, Unload Picture buttons
- Restday: Mon, Tue, Wed, Thu, Fri, Sat, Sun (Sun and Sat are checked)
- Exemption: Lates, Under Time, OT, Skip Lunch, Ignore Lunch and Lates (all unchecked)
- Holiday Group: Group 1, Enforce: Lunch Lates, Lunch Absent (all unchecked)
- Status: [empty dropdown], Date: 24/08/2004
- Leave: Annual Leave 8 day/s, Medical Leave 14 day/s (both checked)
- Buttons: Save and New, Save and Close, Cancel, Active (checked)

The **Employee Profile** is use to keep employee information on the system. It can be sorted as to Department, Gender or All. The grid shows the employees enrolled in the system.

Adding New Employee:

- By clicking the **New** Button, the above window will appear.
- Enroll number is the number that the device reads for logging purposes. It is automatically generated by thumbprint or face machine but can be changed depending on the new employee being registered. Enroll number must be numeric in value.
- Employee number can be same as enrol number or the employment number given by the company.
- Provide the necessary information like *first name, last name, middle name* (complete middle name), and *address, place of birth, gender, birth date, nationality, and telephone number*.
- Provide employment information like department, position, date hired, shift assigned, work status (whether probationary, full time, part time, or contractual).
- Check the day off in the week at Restday where an employee has no work.
- Check also the Exemption for late and early leave. This portion is optional because only managerial positions usually are entitled for such exemptions.
- Enforce. Lunch lates include public holiday/ restday. Lunch absent is enforce if missed punch in/out.
- Meal allowance threshold. Set for normal working day and weekend or public holiday. Total count base on LOW.

- j) Check the Annual Leave if the employee is entitled to. Enter the leave-day-number on the box.
- k) Click *Load Picture* button to add a picture and click *Unload Picture* button to remove it.
- l) The *Save and New* button saves the employee record and add another.
- m) The *Save and Close* button saves the employee record and closes the window.
- n) Click *Cancel* to ignore all changes made.
- o) Auto Shift – Allow system automatically change by choosing more than 1 shift setting. To get this feature work, you must turn ON Auto Shift at “Change Shift” page. *[Go to page 11]*

More features:

- a) Click on “*Edit*” button to modify existing employee profile.
- b) Click on “*Search*” button to search through Employee Number, Enroll Number and Name.
- c) Click on “*Delete*” button to delete unwanted record.
- d) Red cross sign **X** indicate staff have resigned. Just untick “*Active*” inside employee profile.

7. Preferences

7.1 Department

Department is used to create a department in the company where an employee may belong. The grid shows the name and description of existing departments.

Instructions:

1. By clicking the *New* button, the above window will appear.
2. Provide the name and brief description of the department you want to add in the field provided.
3. Click *Save and New* button to save the created department and to add another.
4. Click *Save and Close* button to save the created department and to close the window.
5. Click *Cancel* button to ignore the department created and to close the window.

7.2 Leave Type

Leave Type is use to create leaves to be used by an employee when applying for leave. The grid shows the leave code, description and number of leave per year of existing leaves.

Instructions:

1. By clicking the *new button*, the above window will appear.
2. Provide the leave code (2-digit code), brief description, and number of leave per year (numeric value counted as days) of the leave in the field provided.
3. Click Save and New button to save the leave made and to add another.
4. Click Save and Close button to save the leave made and to close the window.
5. Click Cancel button to ignore the leave made and to close the window.
6. **Take note:** DO NOT add annual leave and medical leave here. It's already available inside Employee Profile.

Editing Existing Leave:

Instructions:

1. Click Edit button and the window same as in *new button* will appear.
2. Only the description and number of leave per year can be changed in Edit mode. The leave code cannot be changed.
3. Click Save and New button to save the leave made and to create another.
4. Click Save and Close button to save the leave made and to close the window.
5. Click Cancel button to ignore the leave made and to close the window.

Deleting Existing Leave:

Instructions:

1. Click the Delete button and the message above will appear.
2. Choose Yes to delete existing leave or choose No to ignore delete.

7.3 Holiday

Holidays is use to create a holiday that will be used as basis for allowing employees not to work for that particular holiday. The holiday made will be reflected in the monthly time record of every employee.

Below show some example of holiday being created. You can create up to 20 groups of holiday. You can rename the group's name instead of show Group 1. You transfer the whole entry of holiday date to following year by pressing the "copy to..".

CLICK Time Management System v1.0.341

Holidays - [View]

Select a Group : Group 1 Rename 2021 Copy To...

Holiday From	Holiday To	Holiday Description	Holiday Type	OT Rate
✓ 01/01/2021	01/01/2021	NEW YEAR	LHP	2
✓ 28/01/2021	28/01/2021	THAIPUSOM	LHP	2
✓ 12/02/2021	13/02/2021	CHINESE NEW YEAR	LHP	2

LHP Legal Holiday Pay

Save and New Save and Close Cancel

Adding Holidays:

Instructions:

1. User will be unable to login not unless he secures authorization from a Supervisor. Supervisor Username and password should be key in to continue.
2. Specify the range of date for the holiday on its respective field. Select FROM as the start date and TO as the end date of the holiday.

3. Enter a specific description of the holiday on the description field.
4. Specify the type of holiday whether SHP (Special Holiday Pay) or LHP (Legal Holiday Pay). The holiday type will be reflected on the monthly time record of the employee.
5. Specify the OT Rate if the worker come to work on the holiday date. OT Rate must be set even the staff may not come to work.

Deleting Holidays:

Instructions:

1. User will be unable to login not unless he secures authorization from a Supervisor. Supervisor username and password should be key in to continue.
2. There are two ways to delete holidays. One is by *Delete* the other one is by *Delete All*.
3. To delete a specific holiday, click the row in the grid of the holiday and click the Delete button then a message box will be prompted. Choose Yes to delete the holiday or No to ignore delete.

Click *Delete All* button to delete all holidays. A message box will be prompted. Choose Yes to delete all holidays or No to ignore delete.

8. Posting

8.1 Changes Shift

The screenshot shows the 'Changes Shift' window with a table of shift changes. The table has columns for Shift Code, Employee, Shift Date (Start/End), No. of Days, Shift Start/Stop, Break Start/End, and OT Shift Start/End. A modal dialog is open for configuring the shift change. The dialog includes fields for Name, Select Department, Date From, Date To, Shift ID, and various shift rules like Lunch Rule, Morning Teabreak, Afternoon Teabreak, and OT Rule. The 'Total Number of Employees Changes Shift' is 1. The 'Enable Auto Shift' checkbox is checked.

Changed shift- is use to adjust the existing shift of an employee for a certain range date and time. Changed shifts can be sorted out by choosing *from* and *to* date which is the range for sorting. After choosing the range, changed shift information is shown in the grid.

Adding New Shift Change:

Instructions:

1. By clicking the *New Button*, the above window will appear.
2. Select the Department and the Name of the employee that wants a change in shift.
3. Click *Select Button* to add the name of the employee to the grid or click ALL to add all employees to the grid.
4. Check the Shift Rule Enable to be able to change the shift date and time.
5. Select **base on the shift ID schedule**, set the OT rule enable time start and end time. Or
6. Select the **Customize Shift Schedule** set time of the start and end of the shift-change.
7. Check the Lunch Rule Enable to change the lunch time for the changed shift date.
8. Select the time of the start and end of the lunch shift.
9. Click Save button to save the shift change made or click Close button to ignore shift change made and to close the window.

Enable Auto Shift:

Instructions:

The screenshot shows the 'Enable Auto Shift' checkbox in the 'Changes Shift' window. The checkbox is checked, and a red arrow points to it.

1. Enable this feature if a staff work more than one shift type. The system will automatically change shift. However, the gap time for change shift must be more than 2 hours.
2. At the "Employee Profile" page, you must click on "Auto Shift" choose 2 or more shift.
3. Set the OT at Shift Setting instead of OT Authorization.

8.2 Time Card

CLICK Time Management System v1.0.215
File Maintenance Posting Report Tools Windows About

Time Card

Date Range: Form: 01/02/2019 To: 31/03/2019
Employee name: All

Device No	Enroll No	Date & Time	Verify Mode	In/Out Mode	Username
1	1	22/02/2019 9:55	1073741824	CI	
1	1	22/02/2019 9:55	1073741824	CI	
1	1	22/02/2019 9:56	1073741824	CI	
1	1	22/02/2019 10:46	1073741824	CI	
1	1	01/03/2019 14:45	1073741824	CI	
1	2	01/03/2019 14:45	268435456	CI	

Employee Log: 6

New Edit Delete Delete All Search Close

Time Card shows the logs of every employee for a particular date range. The grid shows the logs entered in the system for the chosen date range together with other information like the device number and the enroll number of the device; username of the employee are also included. One log is equal to one transaction. You can sort the transactions by the range of date by choosing FROM as the starting date and TO as the end date. To view employee transaction, specify his or her name to do so.

Adding New Transaction:

Transactions Entry - [Add]

Name: ANDY WONG

Date: 27/03/2010

In/Out Mode: CI

Definitions:

CI	Check - In
CO	CheckOut
OFL	Out for Lunch
IFL	In from Lunch
OTI	OT - IN
OTO	OT - OUT

Save and New Save and Close Cancel

Instructions:

1. User will be unable to login not unless he secures authorization from a Supervisor. Supervisor Username and password should be key in to continue.
2. The Name is automatically added when you select an employee on the Time Card window.
3. Select the date that you want to create the new log on the *Date Field*.
4. Select the time that you want to create the new log on the *Time Field*.

5. In the In/Out Mode, specify if the log is CI (Check In), CO (Check Out), OFL (Out For Lunch), IFL (In From Lunch), OTI (OT In), or OTO (OT Out).
6. Click Save and New button to save the log made and to create another one.
7. Click Save and Close button to save the log made and to close the window.
8. Click Cancel button to ignore all the changes made.

Deleting Transactions:

1. User will be unable to login not unless he secures authorization from a Supervisor. Supervisor Username and password should be key in to continue.
2. There are two ways to delete transactions: One is by *Delete*, the other one is by *Delete All*.
3. To delete a specific transaction, click the row on the grid of the transaction and click *Delete* button. A message box will be prompted. Choose Yes to delete the transaction or No to ignore delete.
4. Click *Delete All* button to delete all transactions. A message box will be prompted right after. Choose Yes to delete all transactions or No to ignore delete.

8.3 Leave Application

The screenshot displays the 'CLICK Time Management System v1.0.215' interface. The main window is titled 'Leave - [View]' and contains a grid of leave transactions. The grid has columns for Leave ID, Enroll No, Name, Date(From-To), and Leave Type. Three transactions are visible, all for employee 'Fini Fini'.

Leave ID	Enroll No	Name	Date(From-To)	Leave Type
LV112318171451	21	Fini Fini	08/10/2018-08/10/2018	Emergency Leave (Unpaid)
LV112318171119	21	Fini Fini	09/10/2018-09/10/2018	Unpaid leave
LV112318171119	21	Fini Fini	10/10/2018-10/10/2018	Unpaid leave

Overlaid on the grid is a 'Leave Entry - [Add]' dialog box. It contains the following fields:

- Leave ID: LV3419153658
- Entry Date: 04/03/2019
- Employee No.: 21
- Enroll No.: 21
- Employee Name: Fini Fini
- Time Range: From 04/11/2018 To 04/11/2018
- Count AS: Whole Day
- Leave Type: Emergency Leave (Unpaid)
- Reason: (empty text box)

At the bottom of the dialog box are three buttons: 'Save and New', 'Save and Close', and 'Cancel'. The main window also has a 'Total Number of Leave : 3' label and buttons for 'New', 'Edit', 'Delete', 'Delete All', and 'Close'.

Leave Application can only be access by the supervisor. It is use to grant permission for leave by a requesting employee. The grid shows the employee who requested for a leave and the date range of the request.

New Leave Application:

Instructions:

1. User will be unable to login not unless he secures authorization from a Supervisor. Supervisor Username and password should be key in to continue.
2. On the Entry Date field, enter the date the request was approved.
3. On the Employee Name field, search for the employee's name who request for a leave. After retrieving employee's name, the Employee No and Enroll No are automatically retrieved as well.
4. On the Time Range field, enter the date range of the application in the FROM as the starting date and TO as the end date of the leave.
5. On the Count As field, specify if the leave in the Time Range is WD for whole day or HD for half day.
6. On the Leave Type field, specify the type of leave depending on the type of leave made on the Leave Type module.
7. The reason why the leave was applied for should also be indicated.
8. Click Save and New button to save the leave application and to create another one.
9. Click Save and Close button to save the leave application and to close the window.
10. Click Cancel to ignore all changes made and to close the window.

Deleting Leave Application:

Instructions:

1. User will be unable to login not unless he secures authorization from a Supervisor. Supervisor Username and password should be key in to continue.
2. There are two ways of deleting leave application. One is by *Delete* the other one is by *Delete All*.
3. To delete a single leave, click the row on the grid of the employee who request for leave and click DELETE button. A message box will be prompted. Choose Yes to delete the application or No to ignore delete.
4. Click Delete All button to delete all leave applications. A message box will be prompted. Choose Yes to delete all application or No to ignore delete.

8.4 OT Authorization

The screenshot displays the 'OT - [View]' window. On the left, a list of 'Over-Time Code' entries is shown with checkboxes. The main area is a grid for 'OT Authorization' with columns: 'Over-Time Code', 'Date From', 'Date To', 'Range Allow', and 'Reason'. On the right, a form is open for selecting an employee and setting authorization details. The form includes a 'Select Department' dropdown (set to 'All'), a 'Name' field (containing 'ABADULLA ABADULLA 30002'), and 'Select' and 'All' buttons. Below this, there are date range fields ('Date From' and 'Date To') and a 'Reason' dropdown (set to 'GUARD (NIGHT)'). Further down, there are sections for 'Monday to Thursday', 'Friday OT', 'Saturday OT', and 'Sunday OT', each with fields for 'Range allow', 'Break allow', 'Break Length', and 'Minutes Add'. At the bottom of the form are 'Save' and 'Close' buttons. The bottom status bar of the window shows 'Total Number of Employees Over Time: 14' and buttons for 'New', 'Edit', 'Delete', and 'Close'.

OT Authorization can only be access by the supervisor. It is use in authorizing an employee who is requested to work over time. The grid shows the type of Over Time Code, which is computer generated that shows the employee who is requested to work over time. The range of date and the reason for over time for that range of date is also shown.

Adding OT Authorization:

Instructions:

1. User will be unable to login not unless he secures authorization from a Supervisor. Supervisor username and password should be key in to continue.
2. On the Select Department field, specify the department of the employee who is requested to work overtime.
3. On the Name field, search for the name of the employee with the use of the following information, last name, first name, middle name and enroll number.
4. When the name was retrieved, click on the *Select Button* to add the First Name, Last Name, Middle Name and Enroll Number of the employee to the grid.
5. Click *All Button* to add all employees to the grid.
6. Choose date range for the over time. Click on FROM to set the starting date and TO for the end date.
7. Reason for overtime work should also be indicated.
8. Specify the start and end time of the over time on the specified date range.
9. Minutes Add means computation will back forward from your OT time start setting.
10. Break time can be set range from and to what time. Must tick *Activate Break* if apply.
11. Click on the *Save* button to save over time authorization.
12. Click on the *Close* button to ignore changes made and to close the window.

Deleting OT Authorization:

Instructions:

1. User will be unable to login not unless he secures authorization from a Supervisor. Supervisor username and password should be key in to continue.
2. There are two ways to delete OT authorization: To delete a single person, double click on the row of employee's name list.
3. Or to Delete All employee, just place the curser on the name list and right click mouse, a message box will be prompted. Choose Delete ALL to delete all authorization.

8.5 Employee Rest day Maintenance

Export Raw Transaction data from the system database to text document format (TXT) or excel format (CSV). Once the data are exported, it can be imported to another system that uses the same data. Data that can be exported are employee information and daily transactions. Exporting data can only be accessed by the Supervisor.

Instructions:

1. Select the date range of data to be exported. FROM as the starting date and TO as the end date.
2. Select File Format as “**User Define**” or “**Standard Format**”. As for “**User Define**” format you can change the output manually from the right side field. After changing, please press **Save**.
3. Select the File Format whether Text Document Format (TXT) or Excel Format (CSV).
4. Select the drive and directory where you want to save the file.
5. There is a “**File Name**” field to fill is you really need specific file name. Otherwise just ignore it.
6. Click the “**Export**” button to start transfer the data in to the file created. This is consider manual method.
7. If you want the system auto perform this task daily, weekly or monthly, set it to “**Auto Run**”. There are 4 types of different timing you can set. Do not set anything on “Marker” field as it is auto generate. Remember always “**Save**” your setting before close.
8. Click Close button to close the window.

10.43 Export Payroll Data

Export Payroll Data is to export certain data for payroll purpose. Please take note that TMS only export total in time format NOT in monetary format. You must run full DTR Details Report first before export payroll data.

There are 4 types of option available for payroll. Please choose the appropriate one according to your company need.

10.5 IMPORT DATA

10.51 Import Employee Info

Import Employee Info is used to restore the exported data to be used by the system. Data imported will be added in the system and the present data will not be lost. Data that can be imported are employee information.

Instructions:

1. Click Browse button to locate the exported data in its specified location.
2. Click Import button to start the importing of data in the system database.
3. Click Close button to ignore the importing of data and close the window.

10.52 Import Transaction

Import Transaction is used to restore the exported data to be used by the system. Data imported will be added in the system and the present data will not be lost. Data that can be imported are employee attendance transaction.

Instructions:

1. Click Browse button to locate the exported data in its specified location.
2. Click Import button to start the importing of data in the system database.
3. Click Close button to ignore the importing of data and close the window.

10.53 Import USB Transaction

Import USB Transaction is used to restore the exported data from the machine **CL-918 / CL-928 / CL-938 (AGL_001)** to be used by the system. Data imported will be added in the system and the present data will not be lost. Data that can be imported are employee attendance transaction.

Instructions:

4. Click Browse button to locate the exported data in flash disk as file name **(AGL_001)**.
5. Click Import button to start the importing of data in the system database.
6. Click Close button to ignore the importing of data and close the window.

10.54 Import USB Transaction (K006)

Import USB Transaction (K006) is used to restore the exported data from the machine **K006** to be used by the system. Data imported will be added in the system and the present data will not be lost. Data that can be imported are employee attendance transaction.

10.55 Import Old Database

Import Old Database is used to restore old database into new system database.

Instructions:

1. Click **Open** button to locate the old "**Pay_data.mdb**" file in its specified location.
2. Click **Next** button and select the type of data you want to import, and then press **Next** button. .
3. Click Close **Finnish** button to close the window.

10.6 Database Utility

Database Utility is used to backup, restore, purge and initialize the database of the system. It is done so that the transferring of data is easier and no data will be lost.

10.61 Backup Database:

Backup of Database is used to create a copy of the current database to be stored in a specified folder to be restored to a different computer station or for record keeping.

Instructions:

1. Choose the “BackUp” option.
2. Select the drive and the folder where you want to backup the database.
3. Enter a Filename for the backup of database.
4. Click “BackUp” button to start the backup process. User will be unable to login not unless he secures authorization from a Supervisor. Supervisor username and password should be key in to continue.
5. Click “Compact” button to compress the database to reduce the file size.
6. Click Close button to close the Database Utility window.
7. Auto Backup – Enable this option for system backup the database according to the schedule set. Program Autodownload must activate in order to have this auto backup.

10.62 Restore Database:

Restore of database is used to retrieve the backup database that came from another working station. It is useful especially in times of data lost.

Instructions:

1. Choose the Restore option.
2. Select the drive and the folder where the backup of the database is located.
3. Choose from the list the name of the database to be restored.
4. Click Restore button to start the restoration process. The Log In screen will appear unless you are a Supervisor. Provide the Supervisor User Name and Password to continue.
5. Click Close button to close the Database Utility window.

10.63 Purge Old Logs:

Purge Old logs is deleting all logs or transactions that occurred on the date specified.

Instructions:

1. Click the Purge Old Logs tab.
2. Select the range of date of data to be purge.
3. Click the Purge button to start the purge process. The Log In screen will appear unless you are a Supervisor. Provide the Supervisor User Name and Password to continue.
4. Click the Close button to close the Database Utility window.

10.64 Initialize Data:

WARNING!

Initializing database is to delete all data and setting in the database. It is for new start-up system use.

Instructions:

1. Click the Initialize Database tab.
2. Click the Initialize button to start the process. The Log In screen will appear unless you are a Supervisor. Provide the Supervisor User Name and Password to continue.
3. The initialized tables in the database are shown in the list.
4. Click the Close button to close the Database Utility window.
