- Notice that some data field had **sign. It means there is expandable setting inside. Just double click, it will show further page. Example is below:

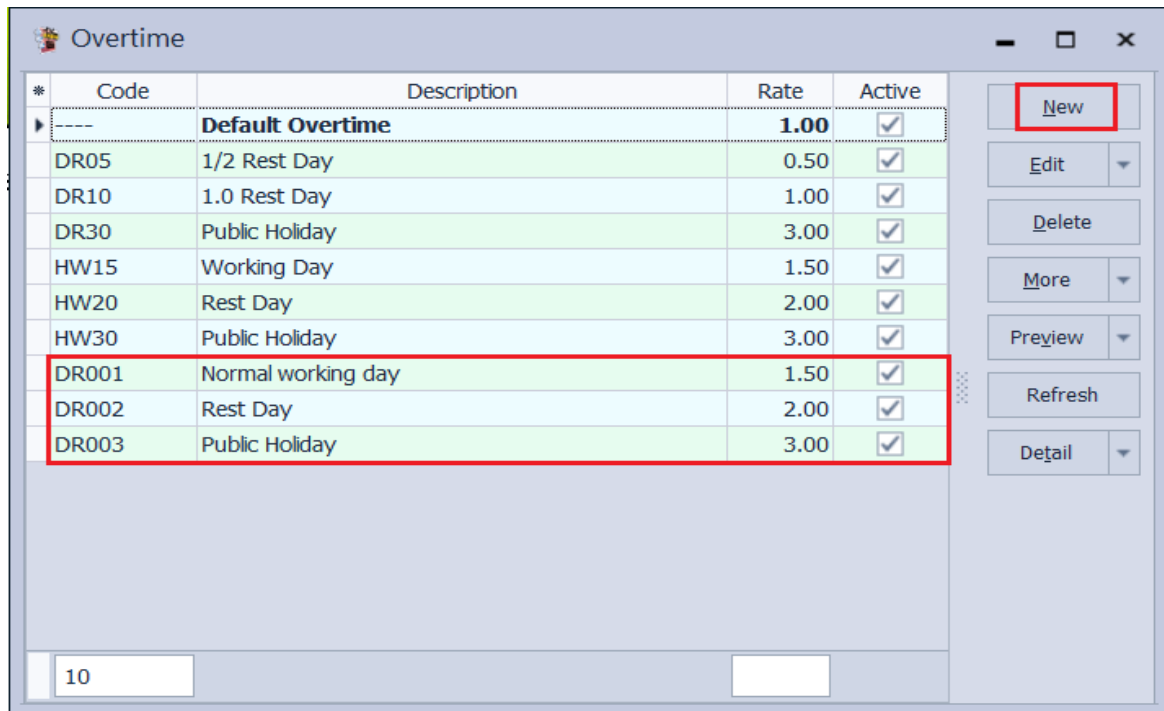

Take note. Codes setting must be same as SQL Payroll. Please refer to SQL code setting for respective data you want to export.

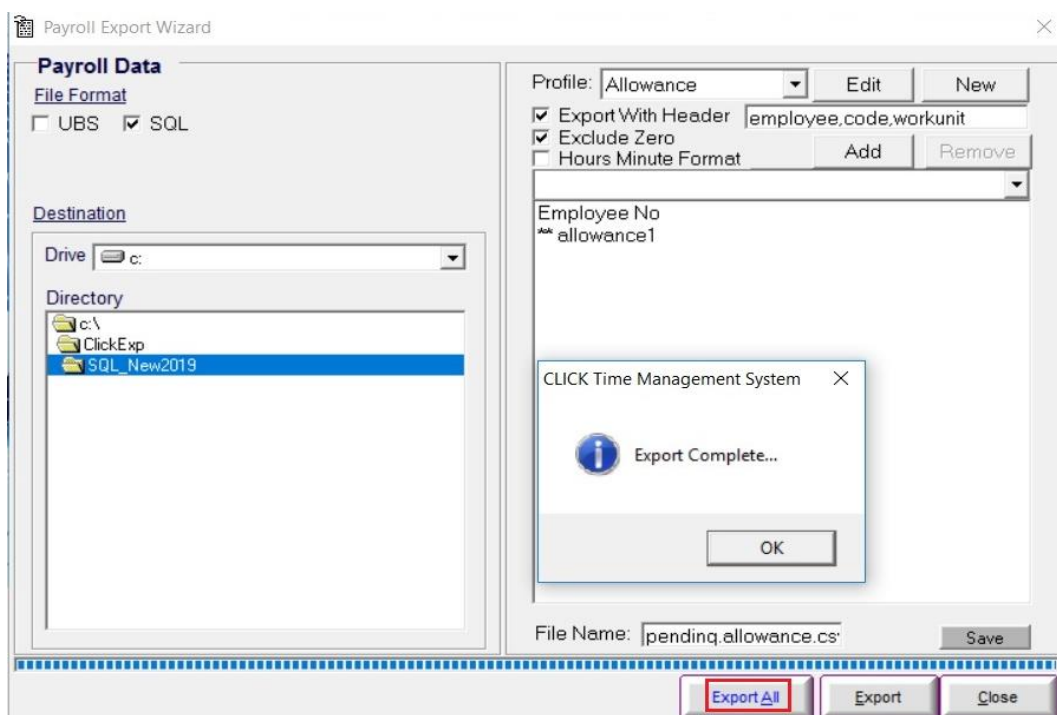

- For SQL payroll system, make sure you have set the payroll code correctly before import data. Here is the example step on OT.

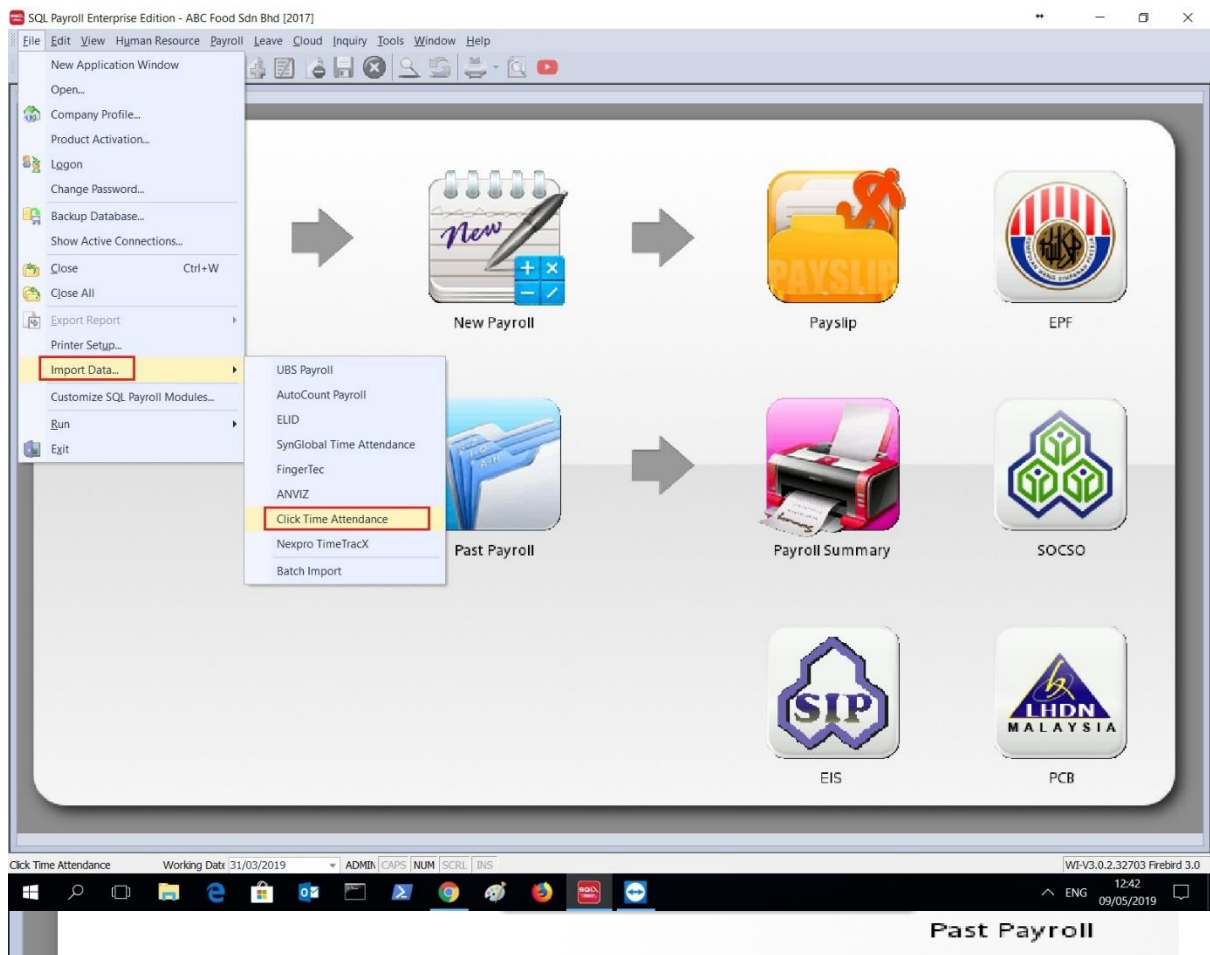

Press “New” to add new code. If you prefer to use back SQL existing code, please set the same code inside TMS’s Payroll profile file as well.

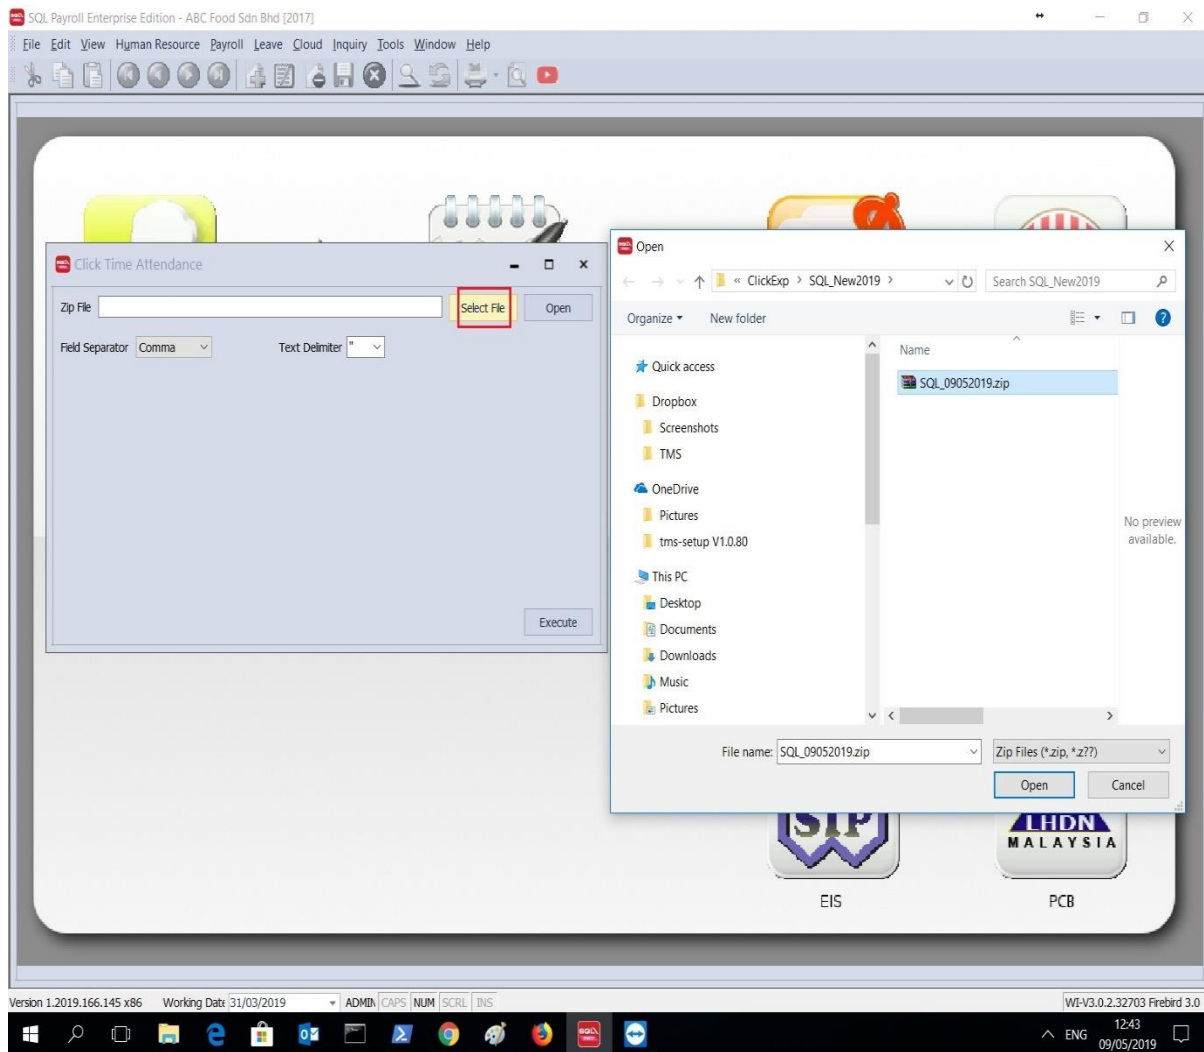

7. To export the file, just press “Export All”. A zip file will automatically created into the path you have set.

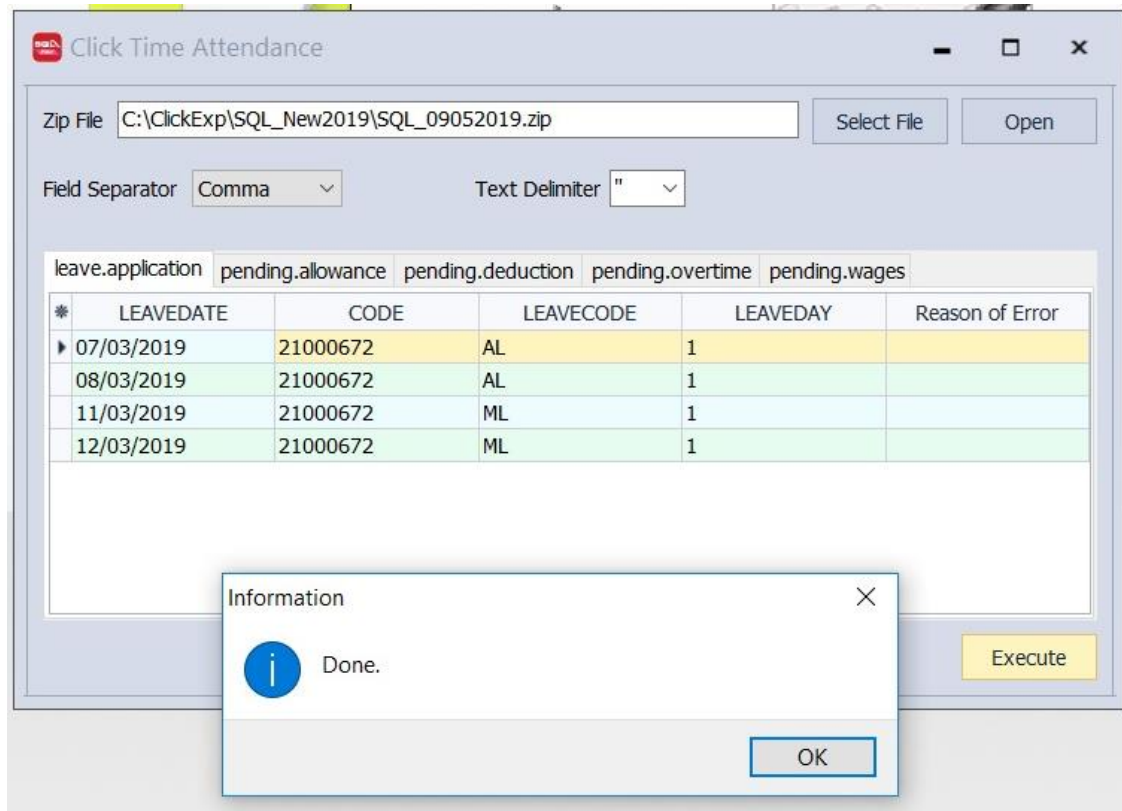

8. Next, open your SQL Payroll software. Go to File | Import Data | Click Time Attendance.

9. Choose “Select File” and find the location where TMS has exported the zip file. And then press “Open”.

10. Press “Execute”, SQL will auto process and show “Done” message. If there is error pop-up, please check again the column field name or code might be wrongly use. Refer back item 4 (E & G).

11. Sample report of SQL Payroll after imported the data.
